**DETAILED ACTION*****Response to Amendment***

This Office Action is responsive to the Amendment filed September 2, 2008. The rejection of claims 1-14 under 35 U.S.C. 112, first paragraph for enablement is overcome. However, claims 1-14 are rejected under 35 U.S.C. 112 first paragraph new matter rejection.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-14 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicant has amended the claim to included that the controller for selected a battery cell and control signal of a terminal is also "controlling the switch controller to perform either charging of the at least one battery cell or supplying

Art Unit: 1795

power from the at least one battery cell via the first and second switches." The specification at page 12, lines 7-10, disclose a switch controller that controls the first and second switches. *The Amendment filed September 2, 2008, does not provide support for this limitation in the specification.* A prior art rejection will issue upon a showing of support of the newly added limitations.
